

Streamers 1

- Each of the four colours must appear once in each row, each column, and each connected streamer.
- To help make patterns easier to see, each streamer is made of pieces with the same shape.

This is a variation of the game of Strimko, which involves numbers rather than colours and shapes.

Streamers 2

- Each of the four colours must appear once in each row, each column, and each connected streamer.
- To help make patterns easier to see, each streamer is made of pieces with the same shape.
