# Streamers 3

- Each of the four colours must appear once in each row, each column, and each connected streamer.

- To help make patterns easier to see, each streamer is made with pieces of the same shape.

This is a variation of the game of Strimko, which involves numbers rather than colours and shapes.

Streamers 4

- Each of the four colours must appear once in each row, each column, and each connected streamer.

- To help make patterns easier to see, each streamer is made with pieces of the same shape.
